ABOUT ME

I'm a Front-End Developer with design skills open to explore new experiences working for or with You! I'm enthusiastic to discover and learn new features and frameworks, to be involved in new projects. Thanks to my background in artistic field I keep implementing the idea-design-functionality twist in work. As Frontend Developer my creativity, abstract thinking and detail oriented working manner are my strengths.

At the present I'm co-working like Front-End developer and designer in an Open-Source Project for Speech-to-Text and Searchable Audio Archive.
